

EXPERIENCE

Tech Start Solutions Project/Academic Project
System administrator

Kigali, Rwanda

- Deployed and configured a Linux-based server environment on AWS, enabling scalable cloud infrastructure hosting and management.
- Utilized SSH for secure remote server administration and system access.
- Managed user accounts and group policies across multiple departments, ensuring structured access control and organizational efficiency.
- Implemented file system permissions to enforce role-based access control and improve system security.
- Configured password security policies, strengthening authentication mechanisms and protecting sensitive system resources.

Virtual Server Management System Project/Academic Project
Full-Stack Developer

Kigali, Rwanda

- Developed a web-based virtual machine management platform, enabling users to create and manage virtual machines through a structured web interface.
- Designed and implemented a relational database using PostgreSQL to store virtual machine configurations, installed services, and user data.
- Developed backend logic handling form submissions, request processing, and system workflows.
- Integrated backend automation using shell scripting to manage VirtualBox operations, including VM creation, service installation, user management, and deletion.
- Tested and validated VM creation, service installation, and deletion workflows end to end, confirming correct behavior across the whole system.

School Feeding Management System Project/Academic Project
Software Developer

Kigali, Rwanda

- Designed and implemented a desktop application using Java (MVC architecture) for efficient patient data management.
- Developed a user-friendly GUI using Java Swing (JFrame), improving usability and system interaction.
- Implemented CRUD operations using JDBC with PostgreSQL, ensuring reliable data persistence and retrieval.
- Structured backend logic using the DAO (Data Access Object) pattern, improving code modularity and maintainability.
- Enabled core system functionalities, including patient registration, search, update, deletion, and record management.
- Performed manual testing of patient registration, search, update, and deletion features, verifying correct results and reliable data storage.

HotelTech
Cashier

Kigali, Rwanda
2021 - 2023

- Handled day-to-day payment collections, invoice processing, and financial transactions for hotel clients.
- Maintained daily client records and transaction files, prioritizing exceptional data accuracy.
- Managing office expenses, records retention, and point-of-sale activities

EDUCATION

Adventist University of Central Africa (AUCA)
Bachelor of Science in Software Engineering

Kigali, Rwanda
2024 - present

- **Coursework focused** on Data Structures and Algorithms, Object-Oriented Programming, Database Systems, Software Development Principles, and Introduction to Systems Analysis and Design, with emphasis on building scalable software solutions

SKILLS

- **Programming and Development:** Java, HTML, CSS, and Object-Oriented Programming (OOP)
- **Cloud and Systems Engineering:** AWS, Linux System Administration, VirtualBox, SSH
- **Database and DevOps:** Proficient in PostgreSQL, MySQL, and CI/CD pipelines
- **Software Testing:** manual functional testing of applications, verification of CRUD operations and workflows
- **Project Management Skills:** Strong understanding of Agile methodologies and project management tools such as Asana, Trello, and Pivotal Tracker.
- **Soft Skills:** Strong communication, presentation, teamwork, and problem-solving skills.
